Kingfishers Autumn 2 Home Learning

For your home learning, choose one activity per week to complete.

Sound Hunt Diary Go on a "Sound Safari" around your house or garden! Write down 5 sounds you hear, describe what made the sound, how loud or quiet it was and how it made you feel. Did it make you happy, calm or excited?	My Voice, My Emotion Record yourself saying the same sentence (eg "I'm going to the park") in 3 different emotions - happy, sad, excited. Write a few lines about how your voice changed and how we use sound to express feelings	Relaxation Sound Jar Make a list of 5 calming sounds (eg. birdsong, waves, soft music). Create a decorated "Sound Jar" - draw or cut our pictures of each calming sound and keep them inside to look at when you want to relax
Feel-Good Playlist Create a "Mood-Boosting Playlist" of 5 sounds that make you feel happy, relaxed or energetic. Write a few sentences about how each song makes you feel and why.	Draw the Music Listen to a short piece of music (you could choose a classical or pop song) Then draw a picture of what it makes you imagine or how it makes you feel. Give your artwork a title.	Musical Emotions Interview Interview someone at home (a parent, carer, sibling) about their favourite music. Ask them: What's your favourite song? How does it make you feel? Do you use music to relax or feel better? Write a short report about what you found out
Make a Musical Instrument Use recyclable materials (like boxes, rubber bands, bottles) to make a simple instrument (eg. a shaker, drum or string instrument) Bring it in or take a picture to share with the class. Describe how the sound changes when you play it in different ways	Sound Experiment Log Try this at home: Tap a spoon on a table near different objects (eg. cushion, class, book) Which makes the loudest or quietest sound? Write down your observations in a table and explain which material absorbed or reflected sound best.	Sound Word Poem Write a short poem or rap using onomatopoeia (sound words like bang, whisper, pop). Your poem should describe a feeling using sound to show the emotion
